

Medium Duty Axle Shafts

Medium Duty Axle Shafts are integral components in vehicles, providing balance and stability when transporting passengers and cargo. Talbros Engineering Limited, a leading Indian manufacturer, specializes in producing these axle shafts for various applications, including passenger vehicles, commercial vehicles, off-road vehicles, and tractors. Their product range encompasses axle shafts and forged components weighing between 3 kg to 50 kg, with flange diameters from 30 mm to 260 mm and bar diameters from 30 mm to 70 mm. Talbros ensures high-quality manufacturing through fully integrated facilities that handle all aspects of production, such as forging, heat treatment, machining, and induction hardening.
