

Chilli Export from India

India is a leading exporter of chillies, supplying high-quality varieties to global markets. The country produces diverse chilli types, including Guntur, Byadgi, and Teja, known for their rich color, pungency, and flavor. The Agrocrops plays a crucial role in promoting [Chilli Export from India](#) by ensuring quality control, market development, and certification. Major export destinations include the USA, China, Sri Lanka, and the Middle East. India's chilli exports thrive due to advanced processing, strong

supply chains, and government initiatives supporting spice growers and exporters. The industry contributes significantly to India's economy and global spice trade.
